Custom Laptop cases

Practical worksheet for comparing models, accessories and fit

Use these tables to shortlist products. Features vary by model: always refer to the product page for sizes, functions and printing options.

1. Start with how the case will be used

Situation	Suggested option	What to check
Laptop needs protection	Envelope-style laptop sleeve	Device size and padding
Small accessories to organise	Organiser bag	Pockets and loops; not a laptop case
Carrying without a backpack	Case with handles	Closure and carrying comfort
Travelling with a trolley	Case with trolley strap	Strap included on this model
New employee kit	Case matched to supplied laptop	Laptop measurements and logo position
Event with different laptops	Common sizes or organiser bag	Check compatibility before handing out

2. Compare the available models

Item	What to compare	Chosen model / notes
Material	RPET fabric or felt; cotton/canvas; cork; faux leather; recycled leather	_____
Protection	Padding and lining, where provided	_____
Closure	Zip, button, magnet, hook-and-loop or elastic	_____
Organisation	Pockets, dividers and elastic loops	_____
Portability	Handles, trolley strap or laptop stand	_____
Printing	Available technique and branding area	_____

Practical note Inches indicate the screen diagonal, not the outer size of the laptop. Always check the dimensions of both the case and the device.

Checklist before ordering

Complete this checklist when comparing products or planning a company-wide distribution. Remember that an organiser bag is not a substitute for a laptop case.

3. Essential checks

Check	OK	To confirm
Recipients and intended use defined		
Laptop size and model known		
Case compatibility confirmed		
Adequate padding and accessories		
Colour and finish selected		
Branding area and printing available		

Check	OK	To confirm
Logo clear on chosen surface		
Artwork proof reviewed		
Sample ordered, if useful		

4. Which printing method to consider?

Artwork / requirements	Technique to consider
Logo with a few solid colours	Screen printing
Detailed design with gradients	Digital transfer
Flat surface, frequent use	Transfer printing
Raised textile finish, no tiny details	Embroidery

Always confirm that the selected printing method is available for the specific model and material.

5. Useful links and notes for the kit
